

CASE STUDY

FLEET MANAGEMENT SOLUTIONS

JP POLYMER SHEETINGS

BACKGROUND

JP Polymer Sheetings is one of Britain's largest independent stockists of rubber sheetings and floorings. They specialise in supplying a comprehensive range of solid rubber sheetings and mattings across diverse market

sectors, from agricultural to architectural, automotive to civil engineering and military to food production, to name but a few. Their high quality product range is backed by a professional service and prompt deliveries.

PROBLEM

A prompt and efficient service is key at JP Polymer Sheetings, and they have operated a simple vehicle tracking system for several years. The current system was slow and dated, and nearing the end of its lease. With a small fleet of 5 vehicles, which included

2 rep cars and 3 delivery vehicles, JP Polymer Sheetings were eager to investigate alternatives on the market. They were keen to install a fleet tracking system that:

- ensured the security of the vehicles at all times
- provided up to the minute

information on the location of the team for both task allocation and productivity purposes.

- achieved a reduction in costs as a result of better management of team and resources.

SOLUTION

JP Polymer Sheetings have a long-standing relationship with Auto Tec, who recommended the installation of one of their leading fleet management solutions. This offers a host of features which capture all of their above concerns:

- real time vehicle tracking & detailed mapping locator software
- simple accessible database of speed, direction and journey history of all your vehicles
- records vehicle working hours, mileage, speed and downtime
- comprehensive management reporting
- fleet managers can access comprehensive driver information such as location, service and MOT warnings, warranty status from one central location
- carbon footprint calculator.

Road Angel Fleet Management System

The service we received from Auto Tec was first class. The new fleet tracking system they installed has enabled us to realise substantial cost savings as a result of improved security, as well as the ability to allocate tasks more efficiently, monitor performance and reduce overtime. The team were extremely helpful and responsive, responding to our query promptly. They also provide excellent after care support too, and I wouldn't hesitate in recommending Auto Tec to others.

Phil Hinton, General Manager
